

BE THE MATCH ~ Share the gift of Life

A young athlete in Bethesda, Maryland, has an aggressive cancer. He is fighting it with all his strength. He needs help, and you may be able to give it.

Ben Lesser, the athlete and a senior at Walt Whitman High School-has many friends who are registering with **Be the Match** as potential *bone marrow or peripheral blood stem cell donors* (PBSC).

But he needs *more* people to register. It's simple to do.

- Ben's medical team can see if you may be a match for him.
- Your registration may also help others; any medical team can check the registry for a match.
- Be the Match may then contact you for further screening for a bone marrow or peripheral blood stem cell (PBSC) match for someone (anyone) in need.
- People with a background similar to Ben's ethnic background, (part Filipino and part European) and aged 18-44 are thought to be especially good matches.
- You must be 18 or older to register.
